FN white&pure

A dream in white.

Beauty is in the eye of the beholder, but lightness can be measured. In addition, water resistance is increasingly important as vinyl and LVT floors become more and more popular.

These profiles combine all of these properties. The weight advantage is a result of a foamed polystyrene core that is enclosed by a smooth, robust, white outer shell that provides an attractive appearance. The water resistance results from the material: PS (polystyrene), a plastic that is also chlorine-free.

All in all, countless benefits, now in white, the new colour trend for skirting boards.

Product advantages:

- PS foam skirting with a very smooth and supple surface.
- Waterproof, suitable for wet rooms.
- Easily glued or nailed, in some cases can be installed with Clipholder CH23.
- Plastic corners also available for K0014L, K0062L and K00620C.
- Very light, easy to transport and handle.
