FN clik-fix 23 LED

Unique light accents for your home.

Nobody likes to stumble around in the dark at night, or wants to turn on every single light in the house just to get a cold beer from the fridge. The solution: subtle, dimmable lighting that illuminates the flooring.

A true innovation from FN: combined mounting rail and LED shaft. You can attach any Neuhofer profile up to 90 mm in height that is equipped with a clip groove. This makes the system flexible and adaptable to any room design.

The system can use any LED strips in various wattages and colours, or simply function as a shaft for cable installation. The aluminium design makes it easy for generated heat to exit the system gently.

Product advantages:

- Combination of mounting rail and LED shaft.
- Maximum flexibility - applicable for any FN profile up to 90 mm / 3-17/32" in height with CH23 clip groove.
- Various LED strips can be glued in.
- The rail can easily be mitred, a plastic corner can be used to cover the skirting
- You can also run cables or wiring in the shaft instead of LEDs.
- Excellent heat dissipation with aluminium
- LED lights highlight the grain of hardwood floors.
- Can also function as emergency lighting at night.
- The sealing lip on the cover makes the profile suitable for damp rooms.
