FN cut-pro

Skirting boards with customizable heights.

"How short?" - we all know that question from the barber shop. With these skirting boards, you get to decide depending on the application and your needs.

This profile is ideal for renovations. Strips of old carpet that are stuck to the wall and are a nuisance, because a beautiful new laminate or LVT floor has been installed. Or tiles that you no longer like and want to cover up.

With this skirting board, simply make a cut along the pre-milled groove, score the V-groove on the back, and snap off the part you don't need. This makes it possible to cut 3 different heights from one skirting board, depending on the intended purpose

Product advantages:

- Ideal for renovations - no need to remove the old trim (ideal for tile trim that can't be taken off).
- The skirting board can be adapted to the old trim by shortening the segments.
- Adjustable to 3 different heights.
- Can cover thicker skirting boards by installing at an angle.
- Simple to install with nails, screws or glue.

FN klik-fix 17 Installation rail

Fastening rail for cable management.

Some people choose this installation rail to have the option for future wiring. Others have a lot of cables to run right from the start.

The length of the rail can be adjusted to the skirting board. It has space for at least 4 different cables with a diameter of up to 9 mm.

The skirting board simply clips onto the wall using previously attached clip system. The selected height does not matter.

Also available as a combination pack with the profile.
