## Screwable nail.

Screw and nail, this clip does it all. The screw goes into the wall and the profile is installed onto the nail. As simple as that. Works with almost all materials: softwood, hardwood, MDF, plastic.

During installation, the clip is screwed into the wall like a regular screw. Depending on the masonry, the included dowel can be used. The screw head has a T15 Torx and is countersunk so it doesn't protrude from the wall. The front of the screw has two fine nails, and the profile is attached onto these using a hammer or mallet.

The clip's installation height is not tied to any grooves in the profile and can be freely selected within the profile height. This makes the installation of profiles with this clip exceptionally easy.

## Product advantages:

- One clip for all profiles (shape and material).
- No dependency on specific installation heights.
- Easy to install with a screwdriver or cordless screwdriver.
- Repeated installation and removal of strips and clip possible.
- Patent pending.
